

THE CZU WELCOME CENTRE HAD JOINED THE CZU SPORTS DAY

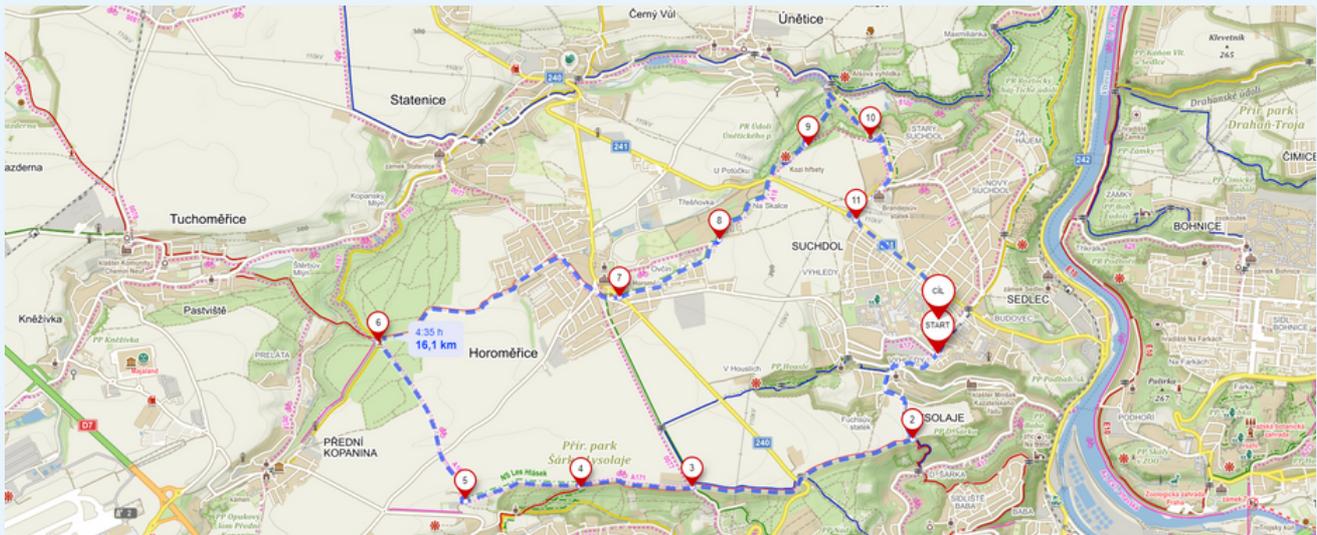

On Thursday, May 19 2022, the Czech University of Life Sciences Prague organized a Sports day for researchers and employees at the CZU campus. The event was attended by all six faculties, the Institute and the Rectorate including the Welcome Centre.

The event was opened by the rector and we had the pleasure to attend a dance performance. After the opening ceremony, the competitions could begin! During the day, the participants could choose from several sports including swimming, football, volleyball, table tennis, shooting, biking and hiking.

To explore the University's surroundings, the Welcome Centre invited international employees and doctoral students to join the march leading from the CZU campus, through Lysolaje and Horoměřice to the Kozí Hřbety rocks and back to the University.

At the beginning of the march, the participants received a map and a detailed description of the directions, however, the group had one leader, Mirka! Along the way, we crossed meadows, forests and rocks. The weather was just perfect and the sun, our dear friend, was shining bright all along those 10 kilometres of walk. After such a demanding morning, the participants were rewarded with refreshments and were able to enjoy watching the ongoing competitions for the rest of the day.

In conclusion, it was really nice to enjoy the blooming nature, discover new places and get some exercise with nice people.

Many thanks to the University for organizing this wonderful event, and to the Welcome Centre for taking advantage of it to make it a socialising day. Finally, thanks to all participants who took part in this walk!
