

Aristotle University of Thessaloniki (AUTH)

M.Sc. in Logistics & Supply Chain Management

About the Department of Economics

The Department of Economics, which was established in 1929, is one of the oldest departments in the university. Within the Business Administration Division, the Department has a reputation for excellence in leadership development among its students. Great emphasis is placed by Members of Faculty on industry/ services links with a strong focus on the transfer of learning and research into action for the advantage of students, industry/ services and faculty.

M.Sc. in Logistics and Supply Chain Management

The MSc in Logistics & Supply Chain Management has been running for over 7 years. As would be expected, the programme has been developed over the years to take into account advances in the subject matter of logistics and supply chain management and improvements including innovations in the associated computer based technologies which are now available to practitioners and researchers alike in the logistics and supply chain management profession. The MSc programme has been designed to develop the skills and confidence of the students to become the future leaders of the profession.

The AUTH MSc in Logistics and Supply Chain Management is a very rigorous academic programme, which develops in the students not only the special knowledge required for performance at the highest professional levels in these areas but in addition gives the students an opportunity to acquire those skills so necessary for top management positions.

The programme extends over 18 months, consisting of a one-year full-time period during which ten core modules are taken, followed by a research /consultancy project as part of the MSc dissertation requirement.

The course is designed for:

- Recent graduates with a good undergraduate degree who wish to develop a deep understanding of logistics and supply chain management and are interested in preparing for a first professional role and a future career in these fields
- Graduates with a good computational background.
- Logistics and supply chain management professionals in the early stages of their careers, who are interested in enhancing their knowledge and skills with a view to moving to the next level professionally.

Previous graduates of the programme have also been selected for admission to PhD programmes at other universities and at this university.
