

Syllabus

Subject	Contemporary Japanese Society 2		Credit	2
Instructor	Yu Cui			
Semester	Fall	Class Style	Weekly	
Year	2018	Class Code		
Class Theme	Learning of how to improve the performance and resilience of the social information system.			
Key Words	Networked Japanese Enterprise, Innovation, Resilience, Industrial Internet			
Class Purpose	Providing insight into how today's businesses and organizations leverage information communication technologies to achieve corporate objectives and resolve certain social issues, with a special focus on Japanese case studies.			
Diploma Policy				
Goal of Class	Explain the role of information systems in organizations and society. Orientate, define, and create solutions as a group for successful digital management strategy and present them orally and in writing.			
Outline	Providing comprehensive and integrative coverage of essential new information communication technologies and their impact on business models, managerial decision-making and evolution of society. In this unit, students will build their own distinct views for recognizing modern digital business world and skills sought after in today's workplace, with the help of Japanese vivid examples. Furthermore, students will be able to understand, participate in, and eventually facilitate discussions and drive decisions about how to achieve the social information system and innovation of organizations.
